### Expressing points of view / Exercise 4

Wow. Where do I start? To be honest with you, I have no idea. In my opinion, this is quite possibly the best game that's ever been made. Incredible story writing, where your choices even on side quests affect the overall main story, with hundreds of different branches of storyline this game will keep you occupied for hundreds of hours, trying to achieve different storylines and experience different parts of the game.

As far as I'm concerned, this game is better than Legend of Zelda: Ocarina of Time, which has been praised as the greatest game for nearly two decades. Some people will agree with that, some won't, but the majority of people will admit that this game is a masterpiece.

Sure, it has its faults; the combat isn't out of this world and there are a few graphical glitches but for the most part, this game runs flawlessly. I feel like an added expansion (which they've promised two of) will secure this games' spot as the best ever made.

To be honest with you, I've tried playing some similar RPG related games after sinking almost 200 hours into TW3 and they just seem so lacking; it almost feels like it's killed all over games for me because I keep comparing them to TW3 and they just don't come close.

I'd love to hear what you guys think and whether you feel the same way about other games just not comparing and feeling empty. If you ask me, no game will come this close to perfection for decades to come.

Answer correctly:

## Completar los espacios

Choose the correct answer:

How many concerts \_\_\_\_\_ to last year?

## Ordenar las palabras

Re-arrange the words to make a sentence:
